

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

My phone bill is now about twice what the basic phone service would cost without the extra fees and taxes, In addition our goofy Iowa legislature and governor are about to deregulate the phone companies in our state which will mean an immediate increase in our bills.

The UFS fee should be eliminated. There is no real need for it. Keep the USF Fair!

Sincerely,

Ivan Stienstra
